Technology And Machinery Park

Qualification Records (WPQRs) meet requirements according to the EN 15614 standard, covering processes 111, 141, 135, and the treatment of regular stainless steel, lean duplex, duplex, super duplex, nickel alloys - Inconel, Hastelloy, Monel, and titanium. OR3 holds a welding qualification according to EN 287, PED included.

Our machinery park comprises modern machines for grinding, edging, sawing, plate rolling, bending, milling, pipe bevelling, pipe rotating/positioning, laser cutting, plasma cutting. The workshops are equipped with horizontal bore drilling equipment, lathes, torch cutting equipment, tank rolling units, etc.

Full list of equipment

Type of equipment	Quantity
Laser cutting	1
Plasma cutting	1
Sawing machines	3
Plate and pipe bevelling	4
Plate bending	3
Plate rolling	3
Profile forming machine	2
Dish end and cone forming machine	1
Milling machines	3
Lathes	2
Pipe rotation/positioning machines	12
Tank rotations unit sets	16
MMA welding machines	12
MIG/MAG welding machines	18
TIG welding machines	24
Orbital welding machines	2
Automated welding column and boom	2
Automated grinding/polishing column	1
Bridge cranes	8
Forklifts	4
